Speciality lubricants for the
film stretching industry

Speciality lubricants for the film stretching industry

The lubricant – a small investment that can make a big difference

You invest a lot of money in your equipment. Of course, you want these investments to pay off as soon as possible. Each service interval, each unplanned repair and each standstill results in service costs and loss of income. Just imagine the bitter news of having to stop the stretching line for cleaning due to increased residues or insufficient bolt lubrication caused by the chain oil!

It is therefore vital to select the right lubricant. Speciality lubricants from Klüber Lubrication are always a good choice. We work in close cooperation with OEMs and film manufacturers to extend service intervals and component lifetime whilst increasing operational reliability. The investment in a lubricant may be relatively small – but it can make a big difference.

More efficiency and operational reliability with the right lubricant

More than ever, operators opt for preventive and cost-optimised maintenance so that they can remain competitive in the face of increasing production costs in a competitive environment. As the entire production process involves a high consumption of resources, you will be looking for solutions enabling efficient and cost-effective production. This is where Klüber Lubrication comes in with its comprehensive range of products and services offering maximum performance.

With our lubricants, we focus us on your industry and applications as this is where you will find the greatest potential for optimisation. Based on our extensive experience, we can offer you lubrication solutions that are cut out for your specific operating conditions. We will help you attain maximum operational reliability.

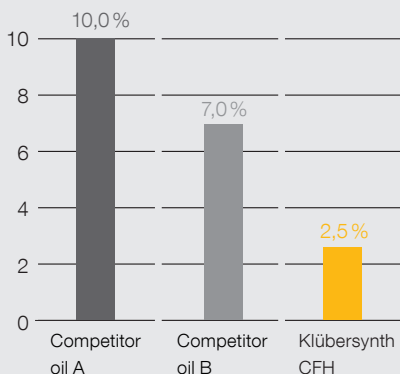

With our products, you will benefit from a more efficient production, longer equipment life, and many other advantages.

Our top products for your industry ...

- **PRIMIUM SUPER / PRIMIUM SUPER M93** – they have been on the market for several decades and are suitable for sliding and roller chain systems
- **Klübersynth CH 2-280** – best-selling product and workhorse for the film-stretching industry; reliable product with an excellent price-performance ratio
- **Klübersynth CHZ 2-225** – our latest development for long machine up-time, due to lowest residue formation ever
- **Klübersynth CFH 2-400** – the “Formula 1” oil for the fastest stretching lines in the world
- **Klübersynth CZ 2-85** – the 3-in-1 chain oil – cleaning effect during production and reduction of power consumption

... are approved by Brückner Maschinenbau, ANDRITZ Biax (DMT), ESOPP and Lindauer DORNIER.

Far less residues – less maintenance!

Klübersynth CFH 2-400 reduces residue formation dramatically, even under extreme operating conditions and thus minimises the need for component maintenance.

* Residue behaviour in % of different chain-oils.
Total evaporation @250 °C
